Contents

1. **Introduction**
2. **System Need**
3. **Software & Database Requirement Specification**
4. **Modules (Entity Relationship Diagram)**
5. **Project Screenshots.**
6. **Advantages & Disadvantages**
7. **Conclusion**

Existing System Issues

- paper based
- inappropriate data keeping
- time wastage in storage, retrieval
- patients were unable to understand the prescription

Features of Proposed System

- Separate user account for doctors and other staff.
- Keeps each patient's data separate, easy to track
- Easy user interface
- PDF of doctor prescription

System Needs

- ▶ To keep track of hospitals day-to-day activities & records of its patients, doctors that keep the hospital running smoothly & successfully there is need of Hospital management System.
- ▶ To digitalize all the version of the manual system.
- ▶ To provide a paper-less hospital up to 90%, i.e. To provide low-cost reliable digitalization of the existing systems
- ▶ To digitalize, the process of day-to-day activities like Registering New Patient, Assigning a Doctor to new patient, Adding new staff members, and finally compute the bill etc.
- ▶ To provide excellent security of data at every level of user-system interaction and also to provide robust & reliable storage facility.

Technologies Used

HTML

CSS

JS

Bootstrap 4

Java™

HIBERNATE

Apache Tomcat

MySQL™

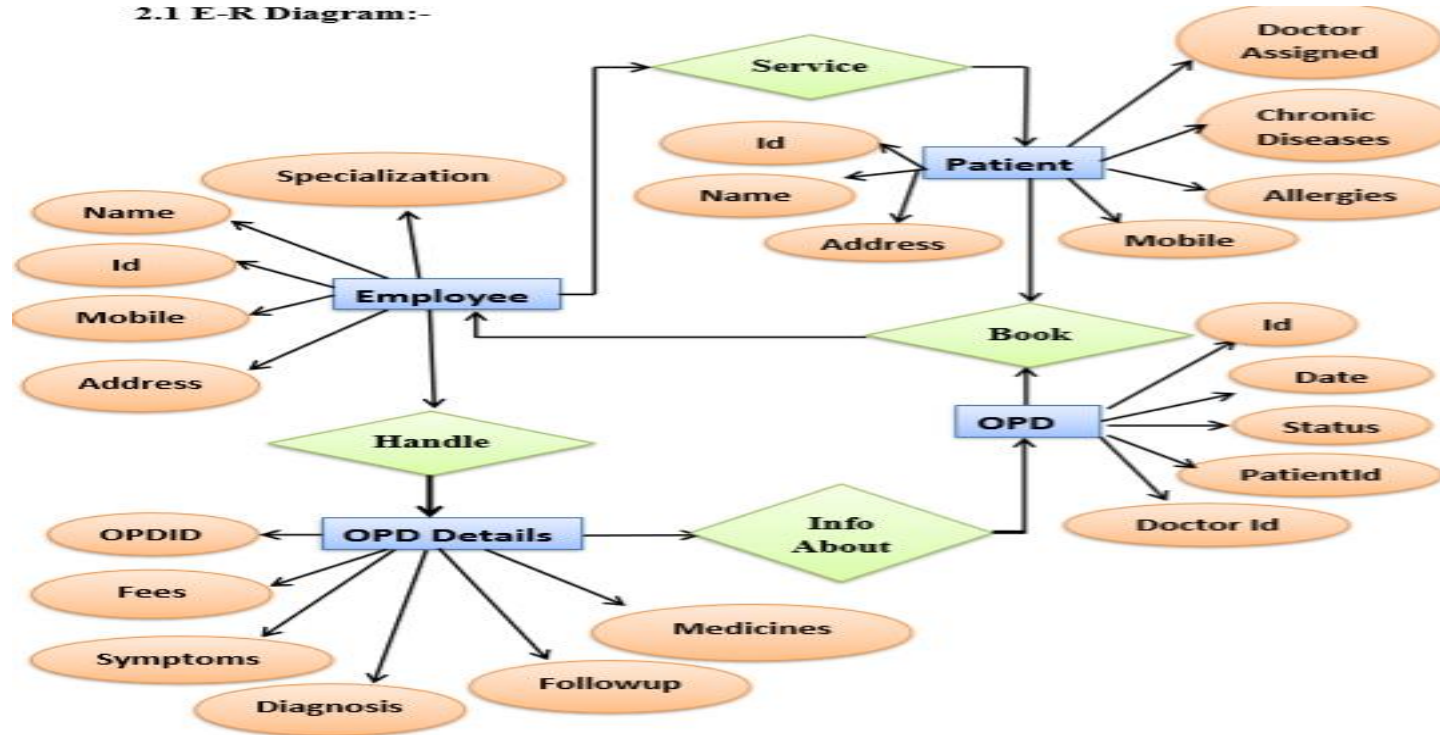

Maven™

Software Requirement Specifications

Content	Description
Processors	i3,i5,i7
Hard Drive	1GB(minimum) , 2GB(Recommended)
RAM	512MB(minimum), 1GB(Recommended)
Operating System	Windows 10,Windows 7,Windows 8

Advantages and Disadvantages

Advantages:

- Makes prescription readable and understandable to patients.
- Eliminate redundancy in term of data storage.
- Reduce the time wasted in retrieving data i.e. in finding a past health records.
- Increase Efficiency and Interactivity in any area of specialization in the hospital.
- Able to quickly collect and edit data ,summerize results.

Disadvantages:

- Patients don't have any role.
- No Live Queue feature.

Conclusion

- ▶ This project helps in making paperless activities. It reduces the workload from Doctor and Receptionist.
- ▶ It provides more ease and flexibility to from Doctor, Administrator and Receptionist.
- ▶ This digitalization has reduce costs of Hospital.
- ▶ This work has created a little awareness and promotes the idea that the concept of paperless office is reality.
